

TRANSCUBE vs FUELCUBE

132, 264, 528, 792, 1000, & 1240 gallon models

The **TRANSCUBE** is a transport approved, double-walled fuel tank designed to provide on-demand fuel supply. Once in place, the **TRANSCUBE** can operate up to 3 pieces of equipment while dispensing fuel by manual or electric pump.

250, 500, & 1000 gallon models

The **FuelCube** is a double-walled stationary fuel tank built for onsite equipment refueling and backup fuel supply. The **FuelCube** can be directly connected to one diesel-powered machine while dispensing fuel by manual or electric pump.
